# WHY MANAGE SCHOOL AT YOUR SCHOOL?

## WHY M SCHOOL

M SCHOOL (Manage School) is a fully integrated Education Management ERP application that provides a reliable and cost effective environment to administer and manage K-12 Education. The key features are the availability of all modules for comprehensive school management, the seamless integration between front office and back office modules, onetime data entry and readily available MIS reports for respective stake holders. This avoids using different applications, multiple data entry, processing data in spread sheets, saves precious Time of IT, Academic and management team and helps in making quick and right decisions. Ministry of Education (MOE) module creates reports in Arabic and English for GCC Countries.

The Parent Portal provides a collaborative platform for Parents, Teachers, Students and Administration department leveraging the benefits of Information Technology for effective information sharing and campus administration. Messaging module provides intranet / internet communication and integration of email servers for easy communication with single & group users. Customized Payroll for GCC with attendance and access system integration is part of the Back Office, which avoids additional spending for a separate Payroll system. Cashless Canteen feature avoids keeping money with the pupils for Canteen Purchases. Finally, we work hard to make our solution match the School's requirements and integrate with school's processes and existing systems.

M School Communicator app is an easy tool to communicate to the parents for generic announcements and common notices.

## Testimonial

The team behind M School is known to me from the year 2001 onwards. They have implemented the first School Management ERP for us during the beginning of our operations and we have been using the application with timely technology upgrades in our schools.

Their customer friendly attitude, proven track record of delivering high quality and cost saving solutions helped us to manage our day to operations smoothly, efficiently and cost effectively.

Reliability, commitment and ingenuity, is what defines our partnership with M School team. I would recommend them to any organisation who are looking for a long-term association.

Saji Kumar Ampotty

IT Manager – Emirates International School, Meadows, Dubai, UAE.
